

3RD QUARTER 2021 IMPACT REPORT

2,418 documents issued in Q3

More than any three month period in our history *

6,169 documents YTD; More than **8,000** projected by year end

Good News, Bad News

* We are gratified to have served 2,148 documents in one quarter, but this is not a celebration. Our relationship with numbers is conflicted. We rejoice in our ability to provide for those seeking to begin a new life, as we lament the rising need for documents. However, because of your support, it is a problem we are prepared to solve. We will continue to expand our reach to meet at risk populations where they are. We will most certainly top 8,000 documents in 2021, an all-time high in our 33 years of operation. The milestone may be bittersweet, but we will set an even higher goal in 2022. With your help, we will further our work until it is no longer necessary; until we have eliminated homelessness in our community!

Meet Cheryl

The loss of a loved one can be stressful. Many of us have experienced this first-hand. For Cheryl, the intense sadness and lack of support system following the death of her mother led to addiction – and addiction led to homelessness. Now 80 days sober, Cheryl came to Homeless ID Project in need of a birth certificate to apply for housing. She is in great spirits and knows that it is critically important to get off the streets as soon as possible to ease her ongoing recovery. Reaching this milestone is a huge step in Cheryl's journey. Because of your support of this work, she is one of many gaining momentum and out to achieve the greatness we all know she can attain!
